WINEO – PROVIDING **SERVICE AND QUALITY** FOR MORE THAN 70 YEARS

wineo stands for quality. We have been producing market-leading flooring and meeting the exacting requirements of the maritime market for three generations now. We combine modern design with maximum quality, innovative technology with genuine comfort, and ecological requirements with economic targets. We offer tailored advice, allowing you the freedom to design and plan.

FINDING THE BEST SOLUTION **TOGETHER**

- dedicated contact person for bespoke solutions
- comprehensive advice to help you plan your projects
- individual support using wineo application technology
- customised designs and colours for your project

SPECIAL SERVICES WE OFFER

■ **samples sent to your door**

Indoor lighting and natural light can influence how a product looks. Discover the quality of our flooring yourself with samples sent directly to you - in whichever format you want.

■ **your collaborative partner is onboard**

We work with you to find the best solution for your project. Personal and friendly support is on hand - not just virtually but in person.

A GLOBAL **SOLUTION**

Modern shipbuilding and state-of-the-art offshore facilities require a high level of technical expertise, as well as reliable and resilient technologies. We have developed a special kind of flooring for these special requirements: wineo 1500 sea.

- outstanding fire protection properties (IMO certified)
- extremely hard-wearing and therefore also long-lasting
- resistant to chemical and mechanical influences + maximum UV resistance
- non-slip and highly effective sound-insulation
- made from sustainable and natural raw materials

WINEO EQUALS EXCELLENCE

wineo 1500 sea provides the best solution for your needs.

- the ideal solution for all different types of ship and a wide variety of offshore platforms and facilities.
- fulfils all safety requirements according to current IMO standards
- extremely hard-wearing, non-slip and easy to clean
- 100 % made in Germany – from development to production
- environmentally-friendly and sustainable

WINEO 1500 SEA – SUSTAINABLE AND EFFICIENT

Our high-quality polyurethane floor covering is based on ecuran, a high-performance composite material, developed and manufactured by Windmüller. ecuran is manufactured primarily from plant-based oils such as **canola oil or castor oil and naturally-occurring mineral components such as chalk.**

IN SUMMARY:

- 100% made in Germany
- without the addition of chlorine, without plasticisers and without solvents
- completely odour-neutral
- does not release any harmful substances into the room air
- extremely durable
- emits no harmful substances into the environment

IMPRESSIVELY VERSATILE AT SEA

wineo 1500 sea can be used in the following applications – corridors, passageways, entire areas used for catering, dining areas, shopping malls, individual shops, sports and fitness facilities, as well as individual suites, cabins and berths. wineo 1500 sea is impressively versatile with its wide selection of wood, stone and uni decors. A great choice for a modern environment – **available in a sheet version or in a variety of plank and tile formats.** See it for yourself ...

WINEO 1500 SEA – CERTIFIED FIRE SAFETY

wineo 1500 sea provides special fire protection qualities especially for the shipbuilding and offshore industries. Its natural formulation means that wineo 1500 sea flooring does not produce any toxic gases in the event of a fire and is exceptional thanks to minimal smoke production.

wineo 1500 sea fulfils all safety requirements in accordance with current IMO standards and is certified according to the IMO 2010 FTP code, which means that it fulfils existing SOLAS and EU regulations.

wineo 1500 sea bears the USCG Approval No.: 164.117/EC0045.

PROVEN QUALITY – WINEO 1500 SEA IN ENDURANCE TESTS

The Pfiff Institute for commercial cleaning technology has carried out extensive assessments of the properties of wineo 1500 sea. The results of the analysis confirm the exceptionally high quality of the flooring.

The results have been summed up as follows: "Its resistance to chemical and mechanical influences and its environmental impact are exemplary. The lifecycle costs of wineo 1500 sea are considerably lower than all other floor coverings currently available on the market."

The Pfiff Institute reports that the flooring is an economic and advisable choice, particularly for heavily frequented areas.

The figures relate to a period of 20 years and a surface area of 100 m².

THE KEY TO ITS SUCCESS

- **residue-free cleaning** – cleaning costs are reduced, resources are conserved
- **absolute resilience** – as good as new even after years, almost 100% resilience
